

HID Identity Verification Service

AN AI POWERED IDENTITY VERIFICATION SOLUTION FOR ONBOARDING AND BEYOND

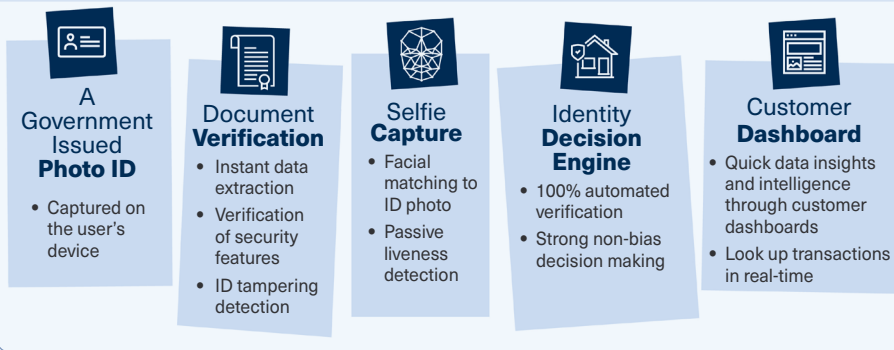

HID offers an identity verification solution that improves general security and user-experience, while helping further the organization's compliance to new directives and regulations. The solution runs a suite of advanced technical checks against every customer submission to ensure that identities are thoroughly authenticated and verified. Your business is protected from fraudulent identities that have been tampered with or forged, as you offer customers a more user-friendly onboarding experience.

- ✓ 99.6% True Accept Rate
- ✓ 0.01% False Accept Rate
- ✓ 100% Automated Document Analysis

HERE IS HOW IT WORKS

Components of a Streamlined Identity Verification Process

- **Frictionless journey** — Offers a smooth, secure and inclusive journey designed to cater to all, addressing both remote and in-person users
- **Supports compliance and helps to mitigate fraud** — An all-in-one solution to support the fight against financial crimes such as ID theft, financial fraud and money laundering, and to help meet compliance standards such as AML and KYC
- **Fully customizable and omnichannel** — Seamlessly embed our business solution into your web, iOS, or Android workflows with a web journey or native SDKs
- **Low total cost of ownership (TCO)** — Through streamlined integration and an all-inclusive pricing model
- **Low customer abandonment rate** — An in-depth and real-time ID verification, liveness check and photo matching in less than 90 seconds that increases customer satisfaction
- **Unmatched Accuracy** — Through AI-powered decision making technology
- **Peace of mind** — From choosing a solution provided by a world leader in identity card and passport manufacturing
